

Dmitrii Goltsov

Java developer

I am a laborious, competent and punctual specialist you can fully rely upon. Moreover, I am a diligent learner and my education and knowledge of foreign languages prove that.

Amongst my achievements, I can emphasise that during the first 3 months of COVID pandemic I negotiated more than \$2 million rent reduction for "M.video-Eldorado" group, which is an example of my communicative and other soft skills.

But despite all that, I have always been keen on modern technologies, especially in IT-sphere. So, last summer, I decided to become a professional programmer. I started with learning basics of operating systems, CVS, and familiarising with different programming languages (via manuals, books, videos etc.).

And I have found a passion for back-end and Java. During my education, I mastered different technologies, contributed to several Open-Source projects and also completed several training projects that can be found on my GitHub profile.
